born on 29 Dec 1985 (31 year), Belgian

## Education

- 2008–2012 PhD in computer science, **University of Louvain** (Louvain-la-Neuve, Belgium)  
Advised by Prof. Olivier Bonaventure.  
Dissertation: *Methods and Techniques for Disruption-Free Network Reconfiguration*.
- 2008–2010 Master in management, **Solvay Brussels School** (Brussels, Belgium)  
Graduated *magna cum laude*, ranked 1 out of 100 students.  
Specialization: Finance. Master's thesis (advised by Prof. S. Peffer):  
*Liquidity analysis of the belgian non-regulated stock market. How to improve it?*
- 2003–2008 Master in computer science (ingénieur civil), **University of Louvain** (Louvain-la-Neuve, Belgium)  
Graduated *magna cum laude*, ranked 1 out of 30 students.  
Specialization: Networks and security. Master's thesis (advised by Prof. O. Bonaventure):  
*Automatic generation and validation of network configurations*.

## Experience

- 2015– Assistant professor, **ETH Zürich**, Switzerland  
I lead the *Networked Systems Group* within the *Information Technology and Electrical Engineering* department (D-ITET). I am also affiliated with the *Computer Sciences* department (D-INFK).
- 2012–2014 Postdoctoral research associate, **Princeton University**, New Jersey, USA  
I collaborated with Prof. Jennifer Rexford on developing new abstractions on top of Software Defined Networks (SDN) to enable better network management.  
  
My projects included:
  - Applying SDN design principles to cellular networks and Internet routing (BGP),
  - Developing techniques and tools to upgrade SDN controllers in a disruption-free manner,
  - Developing transition mechanisms to deploy SDN within traditional IP networks,
  - Scaling Internet routing through filtering without requiring global coordination.
- 2012–2014 Research advisor, **Princeton University**, New Jersey, USA  
I advised three graduate students working on cellular core networks and Internet Exchange Points, as well as one undergraduate student working on SDN.
- 2008–2012 Head teaching assistant, **University of Louvain**, Louvain-la-Neuve, Belgium  
For 4 years, I have been the head teaching assistant for both the introductory and the advanced networking courses. I have also mentored five master students during their thesis.
- Oct–Nov 2011 Visiting researcher, **Roma Tre University**, Rome, Italy  
I implemented a reconfiguration framework and performed large-scale network analysis.

- Feb–Mar 2011 Visiting researcher, **Internet Initiative Japan Innovation Institute**, Tokyo, Japan  
I developed and validated seamless reconfiguration mechanisms for both IGP and BGP.
- 2010–2012 Private tutor, **Université Libre de Bruxelles**, Belgium  
I provided support in statistics, computer science and game theory to master students in business management.
- Summer 2007 Intern, **Belgian national research network** (BELNET), Brussels, Belgium  
I collaborated on the design and on the implementation of Quality of Service in the network.  
At the end of my internship, the project was successfully deployed.
- 2007–2015 Project leader, **Alain & Evelyne Morel de Westgaver Art Auctions**, Brussels, Belgium  
I designed and implemented a complete live auction management software. Since 2007, I have provided customer support and extended the software which is still used daily. I have also actively collaborated in the organization and the operation of 3 to 4 art auctions per year.

## Honors and awards

- 2016 Golden Owl Teaching Award, ETH Zürich  
Usenix NSDI Community Award  
IETF/IRTF Applied Networking Research Prize (for our work on Fibbing)
- 2015 ACM SIGCOMM Best Paper Award  
IETF/IRTF Applied Networking Research Prize (for our work on DRAGON)
- 2013 IEEE ICNP Best Paper Award  
IETF/IRTF Applied Networking Research Prize (for our work on network reconfiguration)
- 2012 ACM SIGCOMM Doctoral Dissertation Award (runner up)  
University of Louvain/ICTEAM Best PhD Thesis Award
- 2008–2012 PhD scholarship from the Belgian scientific research foundation (FNRS/FRIA grant)
- 2010 CeFiP Academic Award Belgium for my master's thesis on SMEs financing
- 2008 Alcatel-Lucent Innovation Award for my master's thesis on network configuration
- 2007 Winner of the Belgium BEST Engineering Competition (beBEC)
