born in Dec. 1985 (32 year), Belgian

Education

- 2008–2012 PhD in computer science, **University of Louvain** (Louvain-la-Neuve, Belgium)
Advised by Prof. Olivier Bonaventure.
Dissertation: *Methods and Techniques for Disruption-Free Network Reconfiguration*.
- 2008–2010 Master in management, **Solvay Brussels School** (Brussels, Belgium)
Graduated *magna cum laude*, ranked 1 out of 100 students.
Specialization: Finance. Master's thesis (advised by Prof. S. Peffer):
Liquidity analysis of the belgian non-regulated stock market. How to improve it?
- 2003–2008 Master in computer science (ingénieur civil), **University of Louvain** (Louvain-la-Neuve, Belgium)
Graduated *magna cum laude*, ranked 1 out of 30 students.
Specialization: Networks and security. Master's thesis (advised by Prof. O. Bonaventure):
Automatic generation and validation of network configurations.

Experience

- 2015– Assistant professor, **ETH Zürich**, Switzerland
I lead the *Networked Systems Group* within the Information Technology and Electrical Engineering department (D-ITET). I am also affiliated with the Computer Sciences department (D-INFK).
- 2018– Scientific advisory board, **ChainSecurity**, Switzerland
The start-up builds upon our research results on blockchain systems security.
- 2017– Scientific advisory board, **Exeon Analytics**, Switzerland
The start-up builds upon our research results on network traffic analysis and anomaly detection.
- 2012–2014 Postdoctoral research associate, **Princeton University**, New Jersey, USA
I collaborated with Prof. Jennifer Rexford on developing new abstractions on top of Software Defined Networks (SDN) to enable better network management.

My projects included:
 - Applying SDN design principles to cellular networks and Internet routing (BGP),
 - Developing techniques and tools to upgrade SDN controllers in a disruption-free manner,
 - Developing transition mechanisms to deploy SDN within traditional IP networks,
 - Scaling Internet routing through filtering without requiring global coordination.
- 2012–2014 Research advisor, **Princeton University**, New Jersey, USA
I advised three graduate students working on cellular core networks and Internet Exchange Points, as well as one undergraduate student working on SDN.

- Oct–Nov 2011 Visiting researcher, **Roma Tre University**, Rome, Italy
I implemented a reconfiguration framework and performed large-scale network analysis.
- Feb–Mar 2011 Visiting researcher, **Internet Initiative Japan Innovation Institute**, Tokyo, Japan
I developed and validated seamless reconfiguration mechanisms for both IGP and BGP.
- 2010–2012 Private tutor, **Université Libre de Bruxelles**, Belgium
I provided support in statistics, computer science and game theory to master students in business management.
- Summer 2007 Intern, **Belgian national research network** (BELNET), Brussels, Belgium
I collaborated on the design and on the implementation of Quality of Service in the network.
At the end of my internship, the project was successfully deployed.
- 2007–2015 Project leader, **Alain & Evelyne Morel de Westgaver Art Auctions**, Brussels, Belgium
I designed and implemented a complete live auction management software. Since 2007, I have provided customer support and extended the software which is still used daily. I have also actively collaborated in the organization and the operation of 3 to 4 art auctions per year.

Honors and awards

- 2018 IETF/IRTF Applied Networking Research Prize (for our work on routing attacks)
- 2017 Roland Meier CyCon Junior Scholar Award (as advisor)
- 2016 Golden Owl Teaching Award, ETH Zürich
Usenix NSDI Community Award
IETF/IRTF Applied Networking Research Prize (for our work on network programmability)
Roland Meier ETH Silver Medal for outstanding master thesis (as advisor)
- 2015 ACM SIGCOMM Best Paper Award
IETF/IRTF Applied Networking Research Prize (for our work on routing scalability)
- 2013 IEEE ICNP Best Paper Award
IETF/IRTF Applied Networking Research Prize (for our work on network reconfiguration)
- 2012 ACM SIGCOMM Doctoral Dissertation Award (runner up)
University of Louvain/ICTEAM Best PhD Thesis Award
- 2008–2012 PhD scholarship from the Belgian scientific research foundation (FNRS/FRIA grant)
- 2010 CeFiP Academic Award Belgium for my master's thesis on SMEs financing
- 2008 Alcatel-Lucent Innovation Award for my master's thesis on network configuration
- 2007 Winner of the Belgium BEST Engineering Competition (beBEC)

Theses

[SIGCOMM & UCL prize]

Methods and Techniques for Disruption-Free Network Reconfiguration
PhD thesis. University of Louvain, Louvain-la-Neuve, Belgium (October 2012)

[CeFiP prize]

Liquidity analysis of the Belgian non-regulated stock market. How to improve it?
Master thesis. Solvay Brussels School of Economics & Management, Brussels, Belgium (June 2010)

[Alcatel prize]

Design and implementation of a software enabling the validation and the generation of network configurations
Master thesis. University of Louvain, Louvain-la-Neuve, Belgium (June 2008)
